

Global & Digital Enablement

Your Gateway to international trade

Global cross-border e-commerce will reach \$424b by 2021, making up 15% of all online commerce

(Forrester Research, 2016)

Mastercard's Gateway allows consumers in different markets to pay using the method and device of their choice - in ways already familiar to them. Capturing a major share of e-commerce transactions, these increasingly global payment options are no longer considered 'alternative' ways to pay. Merchants can now easily expand beyond their domestic borders and provide global consumers with localized experiences. The opportunity is vast.

Examples of accepted Global Payment Methods

Our Gateway supports a wide range of global payment methods specific to regions around the globe. Here are a few examples:

eWallets

+ more!

Online bank transfers

+ more!

Device Payments

+ more!

* Coming soon

Benefits

-  **Reach international consumers** and increase acceptance
-  **Increase loyalty** and reduce basket abandonment
-  **Stay relevant** in a global market place

Key Features

-  Single API integration to securely process all transactions
-  Consolidated reporting to view all transactions in one place
-  Secure tokenized transactions for device payments
